This Project involves building HTML pages for the website. Below are the considerations that need to be factored :

- Whole framework has to be built on FREST theme. Theme will be provided once the contract is finalized. You can check the Theme at -- https://www.pixinvent.com/demo/frest-clean-bootstrap-admin-dashboard-template/landing-page/
- No CSS has to be modified. Use them as in as condition. If any changes are required please discuss first
- If you want to use custom CSS, please take approval first
- All required ICONS will be provided
- This whole specs is to provide details as close as possible to the requirement. Please expect few changes.
- Hexcolors will be provided for all the items where required
- All code have to be done under folder-landing page
- All images will be placed under website folder
- CSS are in two steps, few which are under the website folder and other core CSS which out side folder in app-assets. Donot change this structure

A friction less experience

Laravel

Using Laravel, no worries we have that covered as well. We bundled Laravel with this template.

Firebase & Auth 0 Authentication

Ready to use authentication in Laravel with Firebase, social media platforms, Auth0 & Laravel Passport authentication.

Clean & Minimal Design

Beautifully crafted, clean & minimal designed admin theme with 6 different demos light, dark & semi-dark versions.

Easy Navigation

Carefully crafted, clean, smart & easy theme navigation with collapsible option.

Quick Search

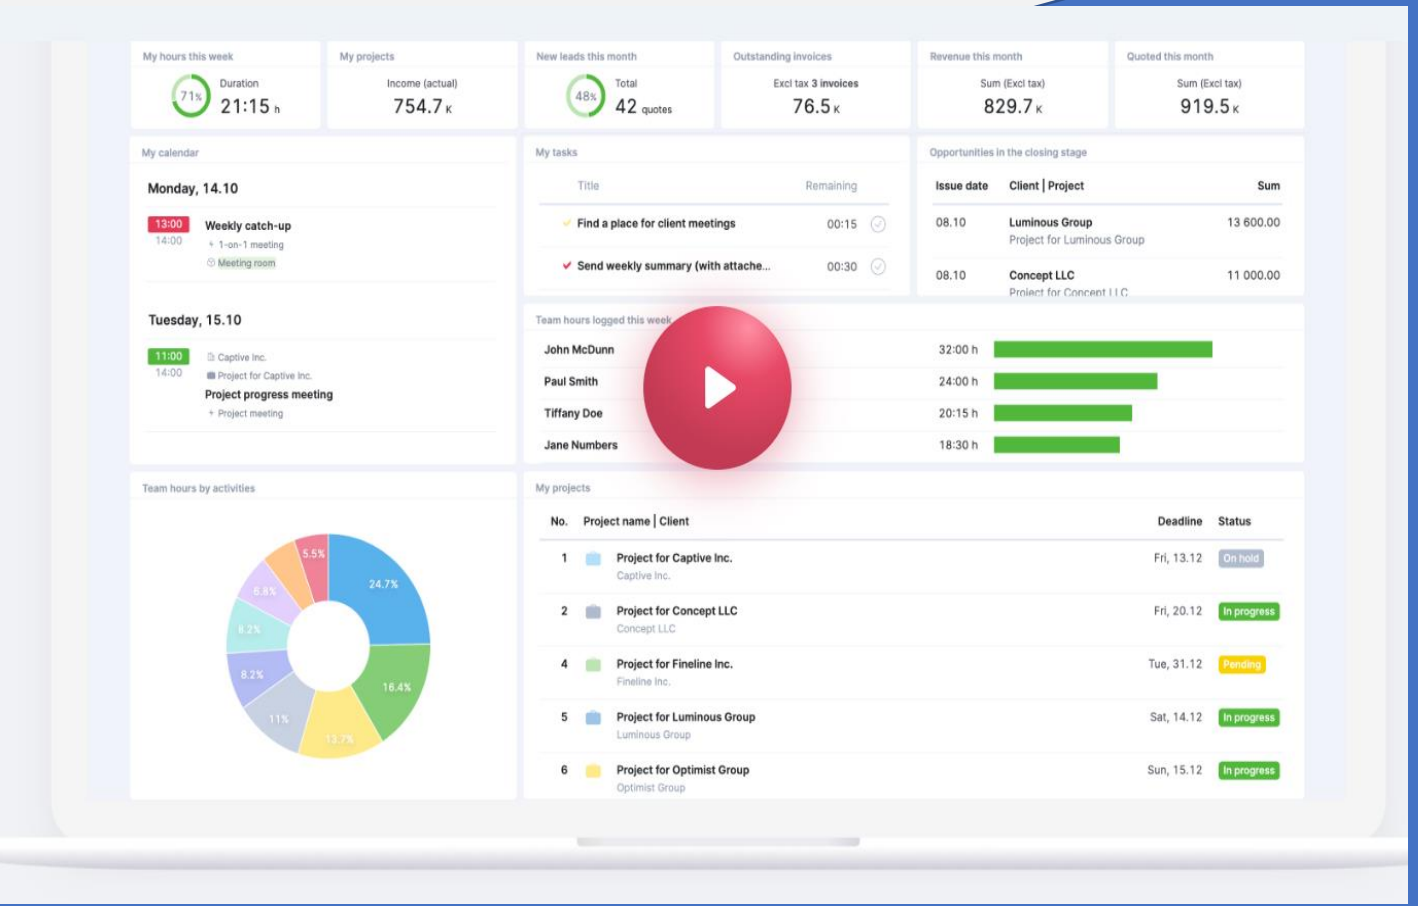
Easy & smart fuzzy search functionality which enables users to search quickly.

My Bookmarks

Bookmarks allows users to select their favourite pages/apps and navigate quickly.

Comments for slide-33

- Use the same design as per FREST landing page -> product features



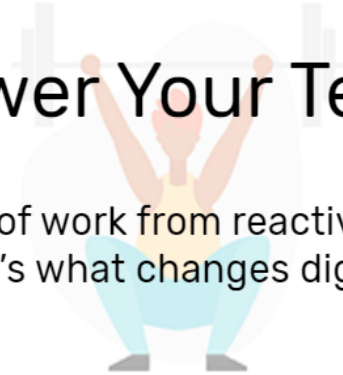
Learn how you can manage your contracts better than ever before

Comments for slide-35

- Place FREST -> video player

Power Your Team

Transform your way of work from reactive to proactive mode.
Here's what changes digitally



Work on things as they show up	Get complete overview of everything at one place
Use spread sheets to track all data	Work on as per the plan
Have no Idea on how the planned tasks are executed	Have comprehensive view of all contracts at one place
Your fieldforce / staff has no idea on the contract commitments	Check actual data for clarity and compliances
Assume chaos is something inevitable	Multiply Customer experience
